HERE’S TO 2020: Residents Sally Campbell and Laura Myers ring in the new decade with a champagne toast (image courtesy of Elizabeth Gebhard); Rob Natoli and his String Swing Trio are in perfect harmony with jazz fans Peg Bouvier and Joe Dinardo.

CELEBRATE VALENTINE’S DAY IN STYLE

Dress up—or accessorize, like Marjorie Davis—for our semi-annual Dress for Dinner (400/420) and Dress for Drinks (370/Villas/Cottages). Violinist Lynne Canavan will entertain in 370 and 400, and keyboardist Ray Valente will provide the musical backdrop for 420 diners. Watch 918 for details.

BIRD LOVER Susan Abrahamsen mesmerized fellow residents with a slideshow presentation showcasing both her vast avian knowledge and spectacular photographs. If you would like to share your expertise with the community, please contact Debi at extension 5227.

GIVING BACK: Check out our new Giving Back page, which includes a video of Andy accepting Boys & Girls Clubs of MetroWest’s Community Partner Award on behalf of Cummings Foundation: countrycommunities.com/.

February is traditionally a month for all things heart-related. It was designated American Heart Month in 1963 to encourage heart-healthy habits and promote awareness of heart disease. Aveanna can help you monitor and maintain your heart health with free blood pressure clinics the third Wednesday of each month. (This month’s clinic will be held February 26.) Nurses will take your blood pressure from 9:30 to 10:00 AM in the 400 Billiard Room.

Although there is debate about how aggressively to treat high blood pressure in adults aged 70 years or older, the definition of healthy adult blood pressure does not change: a “normal” reading is at or below 120/80, and high adult blood pressure starts at 140/90. The top number, systolic pressure, measures when the heart beats and is pumping blood. The bottom number, diastolic pressure, measures when the heart is at rest between beats. Your primary care physician or cardiologist may prescribe a number of blood pressure medications appropriate to your health and age. Taking those medications as prescribed is the best way to keep your BP stable. Always consult your physician with questions about medications and your health.
